*Revera's statement regarding the multi-jurisdictional long term care investigation currently underway in Southern Ontario:*

We are deeply saddened by this tragic and shocking situation, and our sympathies go to the families of the alleged victims.

The accused nurse was not an employee of our company, but worked briefly at Telfer Place as part of a temporary contract with her nursing employment agency from February 2015 to April 2016; at Brierwood Gardens Long Term Care (Brantford) in August 2015 and in May 2016; and at Dover Cliffs Long Term Care (Port Dover) in August of 2016. As there is a broader police investigation, with which we are cooperating, it would be inappropriate for us to provide any further information.

Our dedicated team of employees remain focused on providing quality care and service to our residents.

We are grateful that the police have noted that the alleged victims have been identified and their families informed.
